

BARRIERS TO LEARNING PACKAGE
PRE-PRIMARY, PRIMARY AND HIGH SCHOOLS
**Early identification, referral and classroom
management of disorders and barriers to
learning manual including an electronic copy**

An essential product for every educator who deals with children that may experience barriers to learning.

Cost of the product R 780.00 and includes a hard copy file and electronic copy.

All staff will have access to this fantastic tool from your school's server

The school environment is very demanding of teachers. More and more learners are being diagnosed with disorders which can cause barriers to learning. These need to be managed by the teacher in the classroom. Often, teachers do not know what the symptoms of various disorders are and therefore interpret the child's behaviour as misbehaviour which leads to disciplining the child. This can be very frustrating for the child and the teacher.

The purpose of this manual is to:

- help teachers to understand the nature and symptoms of disorders
- help teachers to identify possible barriers to learning
- provide tips on how to manage these in the classroom
- assisting with early identification and intervention
- Assist when dealing with parents and making the appropriate referral

The manual is divided into the following sections:
